About this Guide

While every effort has been made to ensure that the information contained in this guide is accurate at the time of going to press, changes are likely to occur given the lengthy interval between publication and commencement of the course. It is therefore very important that you check the University and College websites for any updates before you apply for the course by visiting <https://www.graduate.study.cam.ac.uk/> and again before accepting any offer to study at the University. Where there is a difference between the contents of this guide and these websites, the contents of the websites take precedence and represent the basis on which we intend to deliver our educational services to you.

Any offer of a place to study at the University is subject to terms and conditions which can be found at

<https://www.graduate.study.cam.ac.uk/graduate-admissions-policy>

The terms and conditions set out, for example, your key obligations as a student and when we might make changes to your course, the fees payable and the student regulations with which all students are required to comply. Again, it is important that you do read these before making an application.

If you are unable to access our website for any reason, please contact us on +44 (0)1223 760606

Postscript: What Our Students Say	24

Introduction

Cambridge was the birthplace of analytic philosophy in the early 20th century, and has been at the forefront of the discipline ever since. The present Faculty of Philosophy is one of world's leading graduate schools in the subject, with an excellent record when it comes to employment destinations: a very high proportion of our PhD graduates go on to academic positions across the UK and throughout the world. This success rests on the intellectual vibrancy of our graduate student and Faculty community, which, as our students themselves often attest, provides a major catalyst for their future work.

The Faculty takes between 10 and 20 students a year for the MPhil. They join the 20-25 students studying for the PhD to form a lively graduate community. Cambridge has always been a relatively small Faculty and its size, together with a wide variety of seminars and other activities, enables students and other Faculty members to get to know each other well. The Faculty is committed to equality, diversity, and inclusion. We have a dynamic Minorities and Philosophy Group, and an active Equality Working Group with wide representation from staff and students.

New graduate students are usually accommodated by their colleges close to the city centre, the Faculty, and library facilities. Most PhD students, particularly those in their second and subsequent years, do a share of undergraduate supervising; and all PhD students have the opportunity to give some undergraduate lectures in their third year. Students also play an important role in Faculty decision-making.

The Faculty's accommodation includes a Graduate Study Centre and Common Room and our own Library, holding some 17,000 books and about 26 current journals. The University Library is a copyright library, holding every academically important book published in Britain since the early eighteenth century, as well as extensive stocks from overseas. With these and other libraries, facilities for research in Cambridge are second to none. Many Colleges provide funds to support graduate students' research, enabling them to present papers at academic gatherings and meet extra research costs.

We hope you will find this booklet useful and stimulating. It is a supplement to the [University of Cambridge Graduate Admissions webpage](#), which contains general information about graduate work in Cambridge, about Colleges, and about financial support for graduate students from the UK and overseas.

We hope that you will apply to the Faculty for your graduate work.

Rae Langton, Chair of the Faculty
Richard Holton, Director of Graduate Studies

Philosophical Research at Cambridge

Members of Staff

Graduate students are nearly always supervised by members of the Philosophy Faculty. Listed below are the permanent staff of the Faculty with their major research interests. A full, online list of Faculty Staff, including permanent and temporary staff members and their research interests, can be found here:

<http://www.phil.cam.ac.uk/people>

[Dr Arif Ahmed](#), Gonville and Caius College
Philosophical Logic, Metaphysics

[Dr Julia Borcharding](#)
Early Modern Philosophy

[Dr. Angela Breitenbach](#), King's College
Kant, Philosophy of Science, Philosophy of Biology, Aesthetics

[Dr. Jeremy Butterfield](#), Trinity College
Philosophy of Physics

[Dr. Clare Chambers](#), Jesus College
Political Philosophy, Feminist Philosophy, Social Thought

[Professor Richard Holton](#), Peterhouse
Moral Psychology, Ethics, Philosophy of Law, Philosophy of Language

[Professor Rae Langton](#), Newnham College
History of Philosophy, ethics, political philosophy, metaphysics, and feminist philosophy

[Professor John Marenbon](#), Trinity College
Medieval Philosophy

[Dr Jessie Munton](#)
Philosophy of mind, Epistemology and Philosophy of Psychology

[Professor Alex Oliver](#), Gonville & Caius College
Metaphysics, Philosophical Logic, Philosophy of Mathematics

[Professor Michael Potter](#), Fitzwilliam College
Philosophy of Mathematics, Philosophical Logic, History of Analytic Philosophy (especially Frege, Russell and early Wittgenstein)

Professor Huw Price, Trinity College
Pragmatism, Philosophy of Physics, Metaphysics, Philosophy of Language

Dr. Paulina Sliwa, Sidney Sussex College
Ethics, Epistemology, Philosophy of Mind, Philosophy of Physics

Other senior members of the University with philosophical interests include:

- Dr. Anna Alexandrova, Dept. of History & Philosophy of Science
- Dr. Duncan Bell, Department of Politics and International Studies
- Prof. Gábor Betegh, Faculty of Classics
- Dr. Christopher Brooke, Department of Politics and International Studies
- Dr. Jude Browne, Centre for Gender Studies
- Prof. Hasok Chang, Dept. of History and Philosophy of Science
- Dr. Marta Halina, Dept. of History and Philosophy of Science
- Prof. Partha Dasgupta, Faculty of Economics
- Mr. Nicholas Denyer, Faculty of Classics
- Dr. Douglas Hedley, Faculty of Divinity
- Dr. Stephen John, Dept. of History & Philosophy of Science
- Dr. Duncan Kelly, Department of Politics and International Studies
- Prof. Matthew Kramer, Faculty of Law
- Prof. Tim Lewens, Dept. of History and Philosophy of Science
- Prof. David Runciman, Department of Politics and International Studies
- Dr. Frisbee Sheffield, Faculty of Classics
- Dr. Janet Soskice, Faculty of Divinity
- Dr. Findlay Stark, Faculty of Law
- Prof. James Warren, Faculty of Classics

Current Research Students

There are currently some 40 graduates working for higher degrees in the Faculty and many are international students.

The following selection of thesis topics and titles offers a flavour of the range of studies recently undertaken by research students:

- Endurance Theory: An Examination and Defence
- Testing Interventionist Causation: The Case of Organic Chemistry
- Mindreading for animals: psychology without propositional attitudes
- Weakness of the will
- The Common Foundation of Neo-Logicism and the Frege-Hilbert Controversy
- The Trouble with Tokens: Old Problems for the New Agency Problem of Causation
- Fregean Sense in Context(s)
- The Credit Problem
- The Truth Norm Account of Justification
- Democracy, Socialism, and Human Development: A Realist and Comparative Critique of Capitalism
- Action, Intention and Knowledge
- Attitudes and Attribution
- Genealogy and realism
- Public reasoning and moral justification
- Could consciousness be physically realised?
- A metaphysics for semantics and mathematical infinity
- Links between relationism in physics and anti-realism
- Resources, primary goods, and capabilities
- The meaningfulness of aesthetic and affective experience
- Contextualism and its consequences
- Towards a logic of feasibility
- Justifications for intellectual property
- Hegel's criticisms of transcendental idealism
- Trust and moral education
- Systems of arithmetic and their justification
- Notions of identity
- Implications of chaos theory for predictability and determinism
- Intuition and methodology in ethics
- Contemporary metaphysics of form and identity
- Neutrality and normativity in political philosophy
- Rationality and language
- Pacifism, violence and justice
- Knowledge and knowledge attributions
- Moral explanation and the problem of facts
- The role of value judgments
- Possible worlds

- Mathematical necessity
- Supererogation
- Logical consequences, logical form and logical constants
- Power and social policy
- Moral objectivity and judgments of taste
- Thought and language: A critical development of Wittgenstein's writing on intentionality
- Can we require moral obligations when we benefit non-voluntarily?
- Objective truth
- Groundwork for a new causal realism

Course Details

The Faculty of Philosophy accepts graduate students as candidates for the MPhil and PhD degrees. The MPhil provides an excellent foundation for doctoral research, in Cambridge or elsewhere. Many of our PhD students enter the doctoral programme via this route, although we also welcome PhD applications from students with Masters degrees from other institutions.

MPhil in Philosophy

This degree provides a rigorous introduction to philosophical research. For those considering a PhD it provides the skills needed for doctoral studies, and an opportunity to pursue selected philosophical topics in considerable depth. Some of our students stay for a PhD in Cambridge, others go on to PhD programmes elsewhere. Many take it with other careers in mind, simply for the opportunity to broaden their philosophical knowledge in one of the world's leading centres.

Students choose the topics for their written work in consultation with their advisor and supervisor, and then work with the supervisor, typically through several drafts. They develop their abilities in structuring lengthy pieces of work, and in presenting philosophical arguments clearly and effectively. The MPhil class also meet as a group for a weekly seminar, which uses a collaborative format to help students to develop the presentation and discussion skills essential in philosophy.

Course structure

Candidates are examined on the basis of two research essays: the first of up to 4,000 words, and the second of up to 8,000 words; and a dissertation of up to 12,000 words. At least one essay topic must be in one of the following areas of Philosophy, including their history: *Metaphysics and Epistemology, Philosophy of Mind, Logic and Philosophy of Language, Philosophy of Science, Ethics and Moral Psychology, Aesthetics, and Political and Legal Philosophy*. With Degree Committee approval, one essay can be in some other area, provided it is still appropriately related to Philosophy. Both essays cannot come from the same area.

MPhil dissertation topics should be chosen in the light of candidates' essay topics. They must be related to philosophy, and be such that suitable supervisors are available; but they need not fall within the areas listed above. Dissertations may be related to candidates' essay topics, but an MPhil dissertation must not reproduce any significant part of the essays

(see below).

The first essay is submitted at the end of Michaelmas Term (usually early December) and the second at the end of Lent Term (mid-March). The submission date for the dissertation is in mid-June.

The MPhil degree is awarded on the basis of the marks given for the essays (taken together) and the dissertation. MPhil candidates are also examined orally in a *viva voce* for the dissertation.

MPhil candidates wishing to go on to a PhD usually choose a dissertation topic related to their proposed PhD research. MPhil students who move on to become PhD students at Cambridge cannot incorporate their MPhil dissertations directly into their PhD theses, but the latter may be based on the former.

PhD

The Faculty accepts applications for the PhD in a wide range of philosophical areas. The PhD culminates in the production of a thesis of up to 80,000 words, submitted after three years (nine terms) of study, although a maximum of up to four years is allowed.

Registration

Candidates accepted initially for the MPhil can apply while at Cambridge to continue to the PhD, and are considered alongside external applicants for admission. MPhil students accepted to the PhD generally need to satisfy some further conditions, including successful completion of the MPhil, before they can be admitted to the PhD. For further description of these conditions, see page 18, of the Graduate Handbook: 'PhD degree; Steps towards registration'.

All students admitted for the PhD are 'on probation' during their first year. The Degree Committee will decide whether to register them as candidates for the PhD degree, the registration being then backdated to their date of admission.

Before registering graduate students as PhD candidates, the Degree Committee must be satisfied that they have a suitable plan of work and have begun to write about some part of it, in a sustained way, at a standard likely to get them the degree in a reasonable time. Prospective PhD candidates whose work does not show sufficient progress may at this stage be registered only as MLitt candidates. (The MLitt is a lesser degree to the PhD, now used only in these rare circumstances.) They may be re-registered as PhD candidates (with registration again backdated to the

date of admission) if they submit sufficiently improved work during their second year.

The Degree Committee will not defer considering the registration of students as MLitt or PhD candidates without good cause (such as illness); and the Student Registry will not normally let students remain on the Register of Graduate Students (after their third term) without being registered as candidates for some degree. Graduate students who are admitted as Probationary PhD candidates must therefore, with their supervisors' help, start working out their plans of research, and the topic or topics of their written work, as soon as possible after they arrive.

Assessment

A PhD thesis is required to contain some substantial original ideas, while an MLitt thesis need not be so original but should represent a worthwhile contribution to scholarship. In both cases the thesis will be examined jointly by an internal examiner (other than the supervisor) and an external examiner. An oral examination is an essential part of the procedure.

Visiting Graduate Students

Students working for a PhD at other Universities who wish to do research in Cambridge may also apply to be admitted for a maximum period of a year, as graduate students not registered for a Cambridge degree. More information can be found on the Faculty's webpage for visiting students:

<http://www.phil.cam.ac.uk/prosp-students/prosp-visiting-students>

Affiliated Students

Graduates of other Universities who wish to study philosophy in Cambridge, but whose first degree contains little, or no, philosophy, should consider becoming affiliated students. This means taking the Cambridge BA degree in two years instead of three. The course is amply demanding: Cambridge is unusual in providing a full-time philosophy course for all three undergraduate years, so that its final year courses go beyond those of many other universities in range and depth. Moreover, research seminars are generally open to affiliated students, and the optional dissertation in the final-year examination (Part II of the Philosophy Tripos) provides a good way of acquiring research techniques and trying out possible research topics. Affiliated students are not admitted by Graduate Admissions but by colleges: details are available from any college or from the [Cambridge Admissions Office](#), Fitzwilliam House, 32 Trumpington Street, Cambridge, CB2 1QY.

Graduate Courses related to Philosophy in other Faculties

Gender Studies

The Centre for Gender Studies, which is located in the Department of Politics and International Studies, offers an MPhil and a PhD in Multi-disciplinary Gender Studies. See attached link for more details:

<http://www.gender.cam.ac.uk/mphil>

Political Thought

The Faculties of Classics, History, and Social and Political Sciences offer an inter-disciplinary MPhil in Political Thought and Intellectual History, as well as related PhDs. See attached link for more details:

<http://www.hist.cam.ac.uk/prospective-graduates/courses/mphil-pol>

Philosophy of Science

The Department of History and Philosophy of Science is institutionally separate from the Philosophy Faculty and runs its own MPhil and PhD degrees. See attached link for more details:

<http://www.hps.cam.ac.uk/studying/graduate/options.html>

Public Policy

The Department of Politics and International Studies offers an MPhil in Public Policy. See attached link for more details:

<http://cambridgemppblog.org/mphil-in-public-policy/>

Candidates interested in any of these subject areas may wish to consider these alternative degrees, in addition to the options available in the Philosophy Faculty.

Teaching and Teaching Terms

Supervisors

The MPhil and PhD degrees in philosophy are awarded on the basis of individual study and research, but each student has a supervisor whose role is to help and advise the student. The Degree Committee will not accept graduate students for whom it cannot find suitable supervisors, a fact that applicants should bear in mind when framing research proposals. Supervisors may be over-committed or on leave and so it cannot be guaranteed that any particular supervisor will be available.

Students' interests and research topics often change as they progress, and this may make it advisable for them to change their supervisor. This can usually be arranged without much difficulty. Graduate students are expected to discuss their work with more people than their supervisor. They are expected to take the initiative in discussing with each other, and in consulting other members of the Faculty whose work they find to be related to their own.

Lectures, seminars and meetings

There is a weekly seminar for MPhil students, at which they present and discuss their work – the seminar focusses on developing presentation and discussion skills, as well introducing students to a very wide range of philosophical topics. The Faculty also arranges other seminars especially for graduate students, including a graduate seminar, which runs throughout the academic year. Graduate students are encouraged to attend upper-level lectures and seminars that are relevant to their work. Many graduate students run seminars themselves on special topics. The Faculty website has details of current groups and research events. Graduate students are strongly encouraged to attend the Moral Sciences Club, which meets weekly in term to discuss papers normally given by visiting philosophers. See the following web page for further details: <https://www.phil.cam.ac.uk/seminars-phil/seminars-msc> Similar meetings are organised in other Faculties (e.g. the 'D' Society for the philosophy of religion).

Teaching terms

The University's academic year is divided into three teaching terms: the Michaelmas Term, which starts in early October; the Lent Term, which starts in early January; and the Easter Term, which starts in late April. Although the work of graduate students continues throughout the year, their research timetable is arranged in terms. In particular, they are admitted at the start of a term. Candidates for the MPhil must come into residence at the beginning of the Michaelmas Full Term; candidates for the PhD will usually do so.

Additional Course Costs

Philosophy does not generate large additional course costs, but naturally there are sundry expenses involved in studying. These expenses may include library copying cards, USB sticks and printing. It is difficult to estimate realistically the overall cost of these sundries, particularly over the three year period of a PhD, but no student is required to undertake substantial expenditure of this kind.

College Membership

Any student accepted to read towards a degree of the University must become a member of a college. Colleges will not consider an application for membership until the student has first been accepted by the Faculty's Degree Committee.

Most colleges of the University admit graduates; Darwin, Hughes Hall, and Wolfson admit only graduates. Three colleges, Lucy Cavendish, Murray Edwards and Newnham, admit only women. All colleges of the University accept students for a wide range of higher degrees, diplomas and research. Further information on each college can be found here: <https://www.graduate.study.cam.ac.uk/colleges>

Faculty Resources and Support for Students

Libraries

All graduate Philosophy students have access to the Philosophy Faculty's Casimir Lewy Library, the University Library, other faculty libraries, their college library and the electronic resources that are provided centrally.

The **Casimir Lewy Library** on the second floor of the Raised Faculty Building provides support for philosophical study, teaching and research in Cambridge. The book collection comprises more than 16,000 volumes, focusing on Western analytic philosophy, but also covering related interdisciplinary material. In term-time the library is currently open Monday-Friday from 9.00am-6.00pm, Saturdays from 11.00am-5.00pm. For further information, see the library website: <http://www.phil.cam.ac.uk/library>

The University Library, as one of Britain's five copyright libraries, holds every book published in the UK since the early eighteenth century as well as extensive stocks from overseas. The Faculty libraries in Classics, Divinity, History, and History of Philosophy of Science libraries are also useful to philosophy students.

Training is readily available on how to access the many useful resources for research that are available online. This is provided by the Faculty Librarian and also by the graduate skills programme.

Philosophy Graduate Study Centre

The Philosophy Graduate Study Centre provides a dedicated working space within the Faculty for the use of our graduate students to promote contact among students and their teachers and to facilitate the exchange of ideas. It includes an open-plan working area with full computing facilities, a common-room and seminar room.

Graduate Training

The Faculty has developed a comprehensive training programme for its graduates, which runs alongside courses and advice offered by the University's Centre for Personal and Professional Development, School of Arts and Humanities and Careers Service. The Faculty's annual welcome event introduces new graduate students to each other, to the administration of the Faculty and to the philosophical opportunities in Cambridge. There are also sessions organised to introduce the Library, computing facilities, and research aids.

Two sessions are run for MPhil students. The first covers time

management, the effective generation and development of ideas and arguments, the process of writing and presenting MPhil essays, and bibliography. The second discusses all aspects of planning and giving presentations, ranging from the design of presentation aids to speaking on the day.

PhD students contribute significantly to our teaching programme and in support of this, the Faculty offers a series of tailor-made workshops devoted to teaching and transferable skills. Topics discussed include leading a discussion group, effective small group teaching, and supervising and supporting students with special needs. The Centre for Personal and Professional Development runs additional courses on supervising and lecturing.

Teaching and research are not independent activities. Effective teaching demands clear and illuminating presentation, which makes for excellent research. It is also essential that graduate students who intend to continue in an academic career start to publish. General advice on publishing is given by supervisors and the Director of Graduate Studies. In addition, a section in the Faculty Library is dedicated to all these aspects of a graduate student's training. To complement this the School of Arts and Humanities runs a series of workshops on writing and publishing skills, together with annual workshops enabling students to take stock at the beginning of each year of their PhD.

The University Careers Service gives advice and information about careers throughout a graduate student's time at Cambridge and afterwards. Notes on the preparation of CVs, application forms and letters are available for consultation in the Graduate Office, along with sample CVs from recent and current Research Fellows. The Faculty can also provide advice on career prospects and can organise practice presentations and interviews at the relevant times.

Language Learning

The University Language Centre offers weekly lessons for academic reading in German and French, as well as general instruction in other languages. The Classics Faculty provides courses in Greek. See here for further information:

<https://www.langcen.cam.ac.uk/culp/culp-specialist-courses.html>

Computing

In addition to the Faculty's Graduate Study Centre, most colleges provide word processing and, through the University Network, e-mail facilities for their students. All graduate students have free access to computing facilities of the University Computing Service, and the wireless network. See here for further information:

<http://www.ucs.cam.ac.uk/wireless/>

Funding for Research

There are limited funds available to the Faculty to enable graduate students to attend conferences.

Financial Support, Fees and Expenses

Graduate Students in Philosophy at Cambridge are funded from a considerable variety of sources. Each year the Faculty is able to put forward applicants for funding from Cambridge sources that are managed centrally as part of the [Graduate Funding Competition](#). However, it is possible for students who are not nominated to be successful in finding funding sources outside of the Faculty's nominations, such as college awards. Applicants are strongly advised to consult the [Cambridge Graduate Admissions webpage](#), which provides further details and more guidance through what is potentially a complex and confusing field. Students are encouraged to use the [Cambridge Student Funding Search](#), which provides the most comprehensive overview of the funding opportunities available to applicants.

Sources of Funding

Listed below are some of the main sources of funding available to incoming students. In general, those earlier in the list offer more substantial support, e.g. both fees and maintenance or at least a major portion of them, while those lower on the list offer lesser but still useful amounts.

Open-Oxford-Cambridge DTP Studentships

Available to PhD students from the UK and other EU countries

The Open-Oxford-Cambridge DTP offers at least 77 studentships each year, across the range of arts and humanities subject areas. In addition to funding for fees and living costs (depending on eligibility), OOC DTP students benefit from being able to access a variety of other funding sources and a wide range of training available at the three partner universities. Please see the following website for more information:

<https://oocdtp.web.ox.ac.uk/our-studentship>

These awards provide UK students with a full studentship for the duration of the funded period, covering both fees and maintenance. For students ordinarily resident in an EU country other than the UK, a fees-only award covers the University tuition fees for the duration of the funded period. To apply for an award please make this clear on your application form.

For advice on whether to apply you may contact the Director of Graduate Admissions.

Grants from the University of Cambridge

(i) [Vice-Chancellor's Awards & Cambridge International Scholarships](#)

On behalf of the University, the Cambridge Trust is pleased to offer the Vice-Chancellor's Awards (for UK and EU students) and the Cambridge International Scholarships (for international students) for those undertaking PhD studies.

The aim of the Vice-Chancellor's Awards and Cambridge International Scholarships is to ensure that the 250 highest ranked students, irrespective of nationality, receive full financial support to undertake research leading to a PhD. The Scholarships pay the University Composition Fee and a maintenance allowance sufficient for a single person (note application deadline of 3rd December 2019).

(ii) Faculty of Philosophy

The Faculty has one or more of its own awards for which all candidates will automatically be considered. No special application form is required.

Grants from the Cambridge Trusts

The funding opportunities detailed in this section are not available to UK students. Application deadlines are set out in the Applications section of this document.

(i) [Gates Cambridge Trust](#)

The Gates Cambridge Trust offers a substantial number of full scholarships (covering university and college fees, maintenance for a single student and a contribution towards the return airfare) for graduate study or for study for a second Bachelor's Degree as an Affiliated Student. Applicants from every country of the world, except the United Kingdom, are eligible to apply. Please consult the Gates website before writing your statement since the criteria for a Gates Scholarship are not purely academic. You are encouraged to contact the Director of Graduate Admissions for advice on whether to apply and what to include in your statement.

(ii) [Cambridge Commonwealth Trust and Cambridge Overseas Trust](#)

These Trusts offer both scholarships and bursaries. Scholarships pay both fees and maintenance; bursaries are of lesser value. They are to enable overseas students of outstanding academic merit from overseas to study in Cambridge.

Studentships offered by colleges

Conditions of eligibility, methods of application and closing dates vary widely. Applicants are urged to consult the [Cambridge Student Funding Search](#) for details. The following colleges usually or always offer full cost studentships:

Christ's, Clare Hall, Corpus Christi, Darwin, Downing, Emmanuel, Girton, King's, Magdalene, Newnham, Pembroke, Peterhouse, St John's, Selwyn, Sidney Sussex, Trinity, Trinity Hall.

[Jacobsen Fellowships and Royal Institute of Philosophy Bursaries](#)

Fellowships of £8,000 and bursaries of £3,000, each for one year, are available to postgraduates who have already completed one year of postgraduate work.

Burney Studentship and Fund

Research students working in the philosophy of religion may apply for the Burney Studentship or smaller grants from the fund. The studentship is tenable for one year, but a student may be re-elected once.

<https://www.divinity.cam.ac.uk/study-here/graduatefunding#section-9>

Darwin Philosophy Fund

Darwin College will offer annually, by competition, one or more Philosophy Studentships of up to £6,000 to students commencing graduate work in the Faculty of Philosophy. No special application forms are necessary. More information can be found on the link below.

<https://www.darwin.cam.ac.uk/awards-and-scholarships>

Onora O'Neill Studentship

Newnham College will offer annually a studentship of between £3,000 - £12,000 to students commencing graduate work in the Faculty of Philosophy. Current first year Newnham Ph.D students can also apply. Application forms are available from the College Tutorial Office. More information can be found on the link below.

<http://www.newn.cam.ac.uk/admissions/graduates/funding-financial-support/studentships/>

[Stephan Körner Graduate Scholarship](#)

Available to female students who list Murray Edwards College as their first choice college

Murray Edwards College offers this scholarship to a student in Philosophy, Classics or Law, to assist in funding a full one-year MPhil and/or 3-year PhD course.

Further grants and awards from colleges

Many colleges offer bursaries and scholarships for sums of several hundred pounds per annum, and also book grants, help in attending conferences and the like. Conditions of eligibility and application procedures vary widely.

Teaching

Graduate students who are registered for the PhD may offer to undertake supervisions, i.e. small group teaching of undergraduates. This provides very useful experience for future job applications and also a financial

reward. It is paid at piecework rates (currently approx. £28 per hour) and students may undertake up to six hours per week for the twenty teaching weeks of the year.

Graduate students also have the opportunity to lead discussion groups for first and second year students and to assist in the running of first year logic classes. Those who are near completing their PhD's may be invited by the Faculty to give a short course of lectures on the subject of their research. All of these forms of teaching provide excellent experience, useful lines on CVs, and are paid.

Fees and Expenses

Students are liable to pay tuition fees to the University for each term of any degree course they undertake until the course has been completed or a prescribed maximum has been paid (e.g. nine terms for the PhD). In addition to tuition fees, students must budget for their own maintenance (including accommodation) and for the living expenses of any dependents who might accompany them. Although liability is incurred on a termly basis, colleges - who are responsible for collecting University fees - may require students to pay a full year's fees in advance. Estimated annual fees for the 2020/2021 academic year are as follows.

University composition fee

Home and EU rate	PhD - £ 8,589	MPhil - £11,700
Overseas rate	PhD - £24, 531	MPhil - £26,208

General living expenses

As well as allowing for University fees, prospective students must budget for living expenses while at Cambridge. These vary according to individual needs and tastes; the cost of accommodation is a particularly significant factor, as private rented accommodation in Cambridge is more expensive than in many other British cities, and costs considerably more than college accommodation. Married accommodation may be more expensive. The cost of food, clothing, other personal requirements, books, stationery, and other research expenses, including the costs of thesis preparation, and of travel to and from Cambridge must also be budgeted for. Inflation must also be borne in mind.

In order to be admitted to the University of Cambridge, applicants are required to show evidence of funds to cover maintenance costs while studying. The Graduate Admissions website has a useful maintenance calculator, which calculates an estimate for your absolute minimum living expenses while studying at Cambridge. The calculator can be found here: <http://www.graduate.study.cam.ac.uk/finance/maintenance>

Applications

Students who wish to do graduate work in philosophy at Cambridge should apply through the University [Graduate Admissions website](#). Applications are made online and applicants upload all supporting documents electronically.

Applicants for the MPhil must have or be expecting the equivalent of at least a good 2i BA Honours degree (i.e. at least 67%/GPA 3.6) with a minimum of two years' full-time undergraduate study in Philosophy (10 courses in the USA). In practice, successful candidates will usually have or be expecting a First class degree or the international equivalent.

Applicants for the PhD should usually meet the criteria for the MPhil degree just given, and must also have or be studying for a Masters degree in Philosophy or a philosophical subject.

Please note that applications for all postgraduate degrees in philosophy should be made nine to twelve months in advance but that the specific deadlines for receipt of completed applications for admission in October 2020 are as follows:

9th October 2019 **United States applicants wishing to apply for Gates funding**

3rd December 2019 **Final deadline for all other applications (including any applications from UK, EU or Overseas students for AHRC/ Gates/CISS/CCT funding)**

<http://www.graduate.study.cam.ac.uk/how-do-i-apply/deadlines>

Please note that it is your responsibility to ensure that your referees send their references by the due date.

Applications should be accompanied by two *separate* pieces of recent philosophical work **in English**. We recommend that you submit your best work. For PhD applicants, it will in addition be of advantage if one of your writing samples is in the proposed area of study. Each piece of work should be 3,000–5,000 words long. (An applicant needs to be able to write concisely as well as clearly, so exceeding this limit will harm an application.) Applicants for the MPhil should propose an area of philosophy on which they will concentrate their work and indicate whether they intend to study for the PhD in Cambridge thereafter. Applicants for the PhD should also submit a detailed research proposal of approximately 500 words as a separate document.

The Faculty of Philosophy Degree Committee will recommend acceptance (usually conditional) or rejection of applications in the light of applicants' academic records, references, submitted work, proposed research and the availability of suitable supervisors. Every effort is made to accommodate students' preferences about supervisors, but this cannot be guaranteed. Applicants applying to begin a course in October 2020 should receive notification of the outcome of their application by the end of the April 2020. The Faculty is unable to give feedback on admissions decisions.

PhD applicants will be asked to attend an interview, usually by Skype. Applicants who are offered a place on the MPhil or PhD course starting in October 2020 will be invited to attend an Offer-Holders' Open Day on Monday 16th March 2020 in order to learn more about the Faculty and their programme of study. Invitations to attend this Open Day will be sent out, by e-mail, in early March 2020.

Postscript: What Our Students Say

Paula Keller

Overall being on the MPhil has been a challenging but very rewarding experience.

It gave me the opportunity to work in three different areas of philosophy which I made use of working in philosophy of language, history of political philosophy and feminist philosophy. While I very much enjoyed doing so much independent work, organising my day was at times difficult, especially at the beginning. But I believe that having learned how to do and structure independent research during this MPhil will help me while working on a PhD.

A further advantage of graduate study in Philosophy at Cambridge is the Graduate Centre with desks and computers where I work almost every day and leave my books. This allows me to hardly ever work at home, to be around other philosophers while working and I usually leave the Graduate Centre in the early evening. I therefore managed to make time for relaxation and non-academic activities much better than I did during my undergraduate degree also at Cambridge.

During the MPhil I also found time to participate in faculty life: organising reading groups, attending seminars and lectures as well as presenting my own work and doing some teaching has both deepened my philosophical knowledge in areas I am interested in and has helped me gain confidence as a philosopher.

Paula Keller, MPhil student 2018-19

Samuel Hughes

I came to Cambridge in 2015, having done my B.A. and B.Phil. in Oxford. That the Faculty's academic standard is extremely high goes without saying, as does the cultural and intellectual wealth of the wider university. What is really distinctive here is the warm and collaborative culture among the graduate students, and the great extent to which the Faculty operates as an intellectual community. This is a thing of great value, and one that absolutely cannot be taken for granted. Among its happy consequences for me is that fact that, though I came to Cambridge primarily to do specialist work on one topic, it remained easy and natural to learn about many areas of philosophy throughout my time as a doctoral student. I also want to mention the Faculty's tremendous administrative staff, who contribute so much not only to the efficient running of the Faculty, but also to its relaxed and friendly culture.

Samuel Hughes; *current PhD Student (2019)*

Shyane Siriwardena

I have studied here in Cambridge for four years, starting with the MPhil in 2011. The MPhil was excellent training for the PhD which I am now undertaking. My experience here has been overwhelmingly positive. The philosophical community is a very active one, there are ample opportunities to attend seminars, present work, and join reading groups. And even apart from these, I've found that people, faculty, and students alike are so often willing to chat about the work you're doing. Many of the faculty are wonderfully generous with their time; I've never felt at a loss for support in my studies.

What is more, the Faculty supports more than just our studies; they are also mindful of preparing PhD candidates for the job market. I have had the opportunity to do a great deal of teaching in my time here, and this has proved a most rewarding experience. Indeed, once finished my degree here, my plan is to continue teaching philosophy at either the university or sixth-form level.

Finally, I would be remiss if I did not mention the graduate community here: the supportive atmosphere and easy camaraderie have been invaluable to my success. Whether I'm in a philosophical bind, or I'm worried about my progress, I know I can always turn to my peers. We have a great working environment: people are always bouncing ideas and problems off of each other, helping whenever they can. It's a community I'll be sad to leave in a year's time.

Shyane Siriwardena, MPhil Student 2011-12; PhD Student (2012-2016)

Sahanika Ratnayake

I did the MPhil at Cambridge several years ago, at the time not knowing if I wanted to continue with philosophy. To my surprise, I enjoyed the experience so much, I returned for the PhD.

My PhD project is interdisciplinary and lies at the fringes of mainstream analytic philosophy. However, I have been given nothing but support and encouragement. If anything, I have been actively pushed to develop the more ambitious claims in my work. Graduate study at Cambridge gives you enough breathing room to develop your own ideas and approaches. The department is also eager to support your extra-curricular activities - I recently applied for some funding to run a social project and the staff were incredibly helpful with the application.

One of the very special things about studying philosophy at Cambridge is the graduate student community. I have found it to be welcoming and supportive. My peers have given me very helpful feedback on my work and are endlessly encouraging. And if you are ever feeling down - there is a cadre of stuffed dinosaurs in the graduate centre available for cuddling!

Sahanika Ratnayake, MPhil student 2015-16, current PhD Student (2019)

My MPhil year was the first extended time I had to undertake three projects that I could call my own. It was a thrilling, challenging, and incredibly rewarding experience — one that prepared me for continuing years of scholarship.

Ege Yumusak, MPhil Student 2016-17

Alex Horne

The MPhil at Cambridge is a challenging and rewarding experience that provides students with the chance to pursue independent research supervised by an outstanding Faculty. The program offers students who are so inclined maximum flexibility in developing and pursuing a research program commensurate with their interests and strengths. That flexibility can be daunting, but it also lays a solid foundation for pursuing further graduate study. If you require more structure for your learning or wish to undertake significant further graduate coursework, then the Cambridge MPhil may not be ideal for your purposes. But if you are looking for a program that will allow you to become a better philosopher while researching the topics that interest you, together with the help of skilful and generous supervisors, then I cannot recommend the MPhil at Cambridge highly enough. The program's structure also gives students the time to attend many of the Faculty's reading groups, workshops and seminars and to engage fully in the life of the Colleges and University. I have learned an immense amount since arriving in Cambridge and have thoroughly enjoyed my time here, so much so that I am still here for my PHD.

Alex Horne, MPhil Student 2017-18, Current PHD Student (2019)
